

MLT I Training Class

The Machinery Lubrication Technician Level I (MLT I) class is a two day class with the exam on the third day. Most clients prefer the class on Tuesday and Wednesday with the exam on Thursday morning, but we can adjust which days the class runs if necessary. We have found that two days are more than adequate to cover the material and prepare for the exam. The candidates have three hours to complete the 100 question multiple choice exam. To be certified, the candidate must score a 70% or better on the exam.

The following topics are covered:

Lubrication Fundamentals

Lubrication of Equipment Components

Bearings

Gears

Compressors

Hydraulics

Pumps, Motors, and Couplings

Mobile Equipment

Contamination Control

Storage and Handling

Oil Analysis
